4. About Shoezone Website

Shoezone Website is designed with the intent to help the user as much as possible. Therefore, firstly, we placed the items page button on the top right of the home page. Secondly, using CSS hover once the user places the mouse or his finger on an item the shoe name and available sizes appear. Thirdly, for the payment options page, the expected time of delivery appears before placing the order. Fourthly, the latest products added by the owner are shown on the homepage to keep the customer updated. Finally, regarding the contact information clicking on any of the Facebook, Instagram, and location icons directs the user to the Facebook page, Instagram page, and the store location respectively.
